Tube Technology

Kiss Me mascara is introduced as a non oil-based paint mascara with a unique twist. The product forms tiny water-resistant tubes around the lashes that do not run or smudge. There is also no need for rubbing or eye makeup remover. The tubes formed around the lashes slide off with a combination of water and gentle pressure, without any dark circles left behind. The tubes add volume and length to create a radiant natural look.

Ingredients: Kiss Me Mascara: Acrylates copolymer, water (aqua), propylene glycol, triethanolamine, isopropyl alcohol, sodium dehydroacetate, methylparaben, propylparaben
May Contain: Iron oxides, Ultramarine Blue
