Tube Job

Blinc introduces Kiss Me Mascara, a lash-lengthening

product that encases lashes in tiny protective tubes instead of painting them in traditional oil-based paints. Applied just like regular mascara, Kiss Me Mascara sets and adheres to lashes within two minutes, and won't run, smear or smudge even when exposed to moisture. No special removers are required; the tubes slide off effortlessly with a combination of warm water and gentle pressure. For more information call 877/4KISSME, 703/448-9008.
